

LED Rock Light Install Guide

IMPORTANT: Please read all of the following instructions before installing your new LED lights.

Proper installation of this product requires the installer to have a good understanding of automotive electronics, systems and procedures. Do not stare directly into these lights. Momentary blindness and/or eye damage could result. Do not install this product or route any wires in the deployment area of your air bag. Equipment mounted or located in the air bag deployment area will damage or reduce the effectiveness of the air bag, or become a projectile that could cause serious personal injury or death. Refer to your vehicle owner manual for the air bag deployment area. The user/installer assumes full responsibility to determine proper mounting location, based on providing ultimate safety to all passengers inside the vehicle. If this product uses a remote device to activate or control this product, make sure that this control is located in an area that allows both the vehicle and the control to be operated safely in any driving condition. Do not attempt to activate or control this device in a hazardous driving situation.

If mounting this product requires drilling holes, the installer must be sure that no vehicle components or other vital parts could be damaged by the drilling process. Check both sides of the mounting surface before drilling begins. Also de-burr any holes and remove any metal shards or remnants. Install grommets into all wire passage holes. For this product to operate at optimum efficiency, a good electrical connection to chassis ground must be made. The recommended procedure requires the product ground wire to be connected directly to the NEGATIVE (-) battery post or vehicle chasis. Do not attach the NEGATIVE (-) wire to any other existing ground wire. It is recommended that these instructions be stored in a safe place and referred to when performing Maintenance and/or Reinstallation of this product. **FAILURE TO FOLLOW THESE SAFETY PRECAUTIONS AND INSTRUCTIONS COULD RESULT IN DAMAGE TO THE PRODUCT OR VEHICLE AND/OR SERIOUS INJURY TO YOU AND YOUR PASSENGERS IN THE VEHICLE!**

WIRING: RGB Rock Lights or Single Color Rock Lights

RED (Brown): Positive 12 Volts (On/Off Switch)

BLACK (Blue): Negative -12 Volts (Grounded)

Troubleshooting:

1) Always check to be sure a minimum of +12 Volts is applied to the Red wire and that the Black wire is properly grounded. Also, be sure lights are able to draw a minimum of 10 AMPs off of the +12 Volt Power Source.

2) Please double check the connectors, the male connector should insert the female connector on correct position softly. Notice the arrows on the female and male connectors. Line up the 2 arrows, then plug in accordingly.

Warranty: Provided this product is installed and operated in a manner consistent with its use, we guarantee the light for a period of 1 year from the day of purchase. Units demonstrated to be defective within the warranty period will be repaired or replaced at the seller's discretion. Damages resulting from improper use and/or accidents are not covered by this warranty. Aluminum will corrode if left in the elements or area of high road salt use. Proper cleaning of the light is essential to keeping the unit in like new condition.

IMPORTANT: Please read all of the following Wiring Diagram before installing your new LED lights.

- 1) On / 3-Second Press for White Lighting
- 2) Off
- 3) Color Ring Selection
- 4) Brightness Control
- 5) Music Mode Switch
- 6) Speed Control
- 7) Set Mode Switch

GENERAL MODE			MUSIC MODE			MIC MODE
No	Mode	Note	No	Mode	Note	Note
1	Static Mode	Including seven colors	1	Red	Brightness/Speed changing with music	Modeswitch is available in MIC mode
2	Seven Colors Blink	Speed adjustable	2	Green		
3	RGB Gradual		3	Blue		
4	Seven Colors Gradual		4	Purple		
5	Red Blink		5	Orange
